Experience/Projects

Soft Access Ltd
June 2024 – Present
Laravel Developer

Developed dynamic and scalable web applications using Laravel and Livewire, ensuring seamless functionality and user experience. Collaborated with cross-functional teams to deliver optimized solutions tailored to project requirements, focusing on clean and efficient code. Integrated advanced Laravel tools like Herb, Forge, and Envoyer for deployment, performance optimization, and workflow automation.

Asian Solution LTD
January 2023 – June 2024
Full Stack Laravel Developer

Built and maintained robust web applications by leveraging Angular for the frontend and Laravel for the backend, ensuring high-quality, responsive designs. Collaborated with teams to develop feature-rich applications that adhered to industry best practices and client requirements. Implemented effective debugging and testing strategies to ensure software reliability and maintainability.

Khadim Hospital
January 2020 – January 2023
PHP Developer

Led frontend and backend development projects, enhancing the hospital's online systems for improved patient engagement and operational efficiency. Successfully integrated healthcare systems and third-party tools, improving functionality and streamlining workflows. Implemented SEO strategies to increase online visibility and ensured security measures to protect sensitive patient data. Maintained the hospital's website for optimal performance and responsiveness across devices.
